MEMORANDUM FOR: All Personnel in Secure Area

SUBJECT : Change in Fire Evacuation Plan

1. The latest Fire Evacuation Plan indicates a change in the traffic flow in F corridor requiring personnel from GF-18 to turn left and proceed to the Northeast Exit. This would be impractical since GE-47 is closer to the Northeast Exit.

Therefore, the following plan will be effected:

- A. Typing, IPI, and Indexing personnel use GE-47 to the Northeast Exit.
 - B. All others use GF-28 or GF-40 to the North Loading Pedestrian Exit.
 - C. Do not use GF-18.
2. NOTE: The new traffic flow plans are posted on the bulletin boards.
